

At Laurel Mountain, the enrichment clusters are going strong in kindergarten and first grade. Last Friday, May 1st, the K and 1st grade students met with their first enrichment cluster for the last time. These groups met for a total of three hours during our Enrichment Slot, or E-slot.

Today, the kindergarteners and first graders were excited to switch to their second enrichment cluster. Since tomorrow is an Early Release day, we decided to have the E-slot take place on a Thursday instead of our usual Friday. This second enrichment cluster will also meet a total of three times during the E-slot on May 7th, May 15th and May 22nd. This gives our kindergarteners and first graders a six week experience in enrichment clusters. The Enrichment Cluster Showcase will be on May 29th. An invitation will be coming home soon with the times and schedule.

Next time you are at LME, please take a moment to look at our enrichment board by Mrs. Richards's office. You will find the summaries for each kindergarten and first grade enrichment cluster, along with photographs of the enrichment cluster groups.
